

QUESTED - Automated Q&A System for Students

Project Description

QUESTED is an AI-powered Q&A system designed to assist students in quickly finding answers to questions from their course materials. Using **Natural Language Processing (NLP)** and **OCR technology**, this system extracts relevant information from predefined academic sources, making learning more interactive and accessible.

Project Link

<https://huggingface.co/Kav36/quested>

Technology Stack

- **Frontend:** Not specified (Can be added if applicable)
- **Backend:** Node.js, Python
- **OCR Engine:** Tesseract OCR
- **AI & NLP:** Python libraries for text processing

Installation & Setup Instructions

Prerequisites

Before setting up the project, install:

- **Node.js & npm**
- **Python 3.x**

Step 1: Clone the Repository

```
git clone https://huggingface.co/Kav36/quested
cd quested
```

Step 2: Install Dependencies

Run the setup script to automatically install required dependencies:

```
./setup.sh
```

Step 3: Start the Application

Once installation is complete, start the server:

```
npm start
```

Usage Guide

1. Open a web browser and navigate to the specified **localhost** or deployed URL.
2. Enter a question related to academic content.
3. The system processes the query and returns an accurate answer from predefined sources.
4. If OCR is used, users can upload images of textbook content for text-based extraction
